Submission of application to be awarded the HR Excellence in Research

The Geological Survey of Denmark and Greenland (GEUS) has endorsed the recommendation of the European Commission on the “European Charter for researchers” and the “Code of Conduct for Recruitment of Researchers”. January 12, 2017, I notified the Commission that GEUS committed to get involved into the process of implementing the principles in a Human Resources Strategy for Researchers (HRS4R) in our institution.

GEUS has now completed the initial phase of the HRS4R process.

We hereby submit the application for GEUS being awarded HR Excellence in Research. We confirm that the information presented in the application (including qualitative and quantitative data) is an honest, accurate and true representation of the institution.
