Focus on Marie Sklodowska-Curie Actions (MSCA) for Brazilian researchers and institutions

The Marie Skłodowska-Curie Actions are European grants offered to researchers at all career stages and in all scientific areas* and encourage transnational, intersectoral and interdisciplinary mobility.

The expected impact of the MSCA in Horizon 2020 includes the support of ca. 65,000 researchers, including 25,000 PhD candidates, ca. 200,000 scientific publications in high impact peer-reviewed journals, and ca. 1,500 patent applications. The MSCA will enable up to 15,000 non-EU researchers to start or pursue their careers in Europe by 2020.

</thead>
<tbody>
<tr>
<td>Innovative Training Networks (ITN)</td>
<td>Support for doctoral and early-stage training networks, industrial doctorates, joint doctorates</td>
</tr>
<tr>
<td>Individual Fellowships (IF)</td>
<td>Support for experienced researchers undertaking international and inter-sector mobility: European fellowships and Global Fellowships. Dedicated support for career restart and reintegration</td>
</tr>
<tr>
<td>Research and Innovation Staff Exchange (RISE)</td>
<td>International and inter-sector cooperation through the exchange of staff</td>
</tr>
<tr>
<td>Co-funding of programmes (COFUND)</td>
<td>Co-funding of regional, national and international programmes: - doctoral programmes - fellowship programmes</td>
</tr>
</tbody>
</table>

*All research areas can be funded under MSCA, except those covered by the EURATOM Treaty.
MSCA - What’s in it for Brazilian researchers and institutions?

1. Innovative Training Networks (ITN) is the main European doctoral training programme, putting a special emphasis on non-academic sector participation and the innovation dimension.

Brazilian research institutions: This action is meant primarily for organisations such as universities, research centres or companies, that propose a research training network. Brazilian organisations can join the consortia to submit a proposal.

Brazilian researchers: can apply to the PhD positions created by these networks, including Industrial Doctorate and Joint Doctorate. They are advertised on the Euraxess Job portal.

2. Individual Fellowships (IF) are for experienced researchers to undertake their own research project at a host organisation in another country, thus gaining new skills through advanced training and possibly, intersectoral mobility.

Researchers based in Brazil can apply for a European fellowship to perform a research stay of up to 2 years in Europe, choosing to apply either for a re-integration grant, a scientific grant or a society & entreprise grant in the non-academic sector.

Researchers based in Europe can apply for a global fellowship to carry out research in a third country such as Brazil and return to Europe. They can also apply to a European fellowship for mobility within the EU or associated countries (EU/AC).

Research institutions from Brazil are eligible to host post-doctoral researchers coming from the European Union and Associated countries.

3. Research and Innovation Staff Exchange (RISE) enables international and intersectoral collaboration, based on short-term staff exchanges between organisations worldwide.

Brazilian research institutions can join a consortia as partner, but can’t receive direct funding from the European Commission for the secondment of their researchers.

Calls are annual and advertised on the Horizon 2020 Participant Portal.

MSCA ITN calls are open to institutions only.

MSCA IF are open to individual researchers. They apply in partnership with a host institution based in any European member state or country associated to Horizon 2020.

In case of Global Fellowships, institutions in Brazil will be considered as “partner organisations”.

MSCA RISE are open to institutions such as universities, research centres or companies from everywhere in the world.

MSCA COFUND are open to European funding organisations.

4. Co-Funding of regional, national and international programmes (COFUND) calls are open to European research (funding) institutions, Brazilian organisations can be partner organisations in a proposal. COFUND supports many high-quality fellowships or doctoral programme positions, which include transnational mobility.

Brazilian researchers: Doctoral candidates can apply directly to COFUND positions advertised on the EURAXESS job portal while experienced researchers apply directly with the funding organisations.
